Joan McParland
Newry & Mourne ME Fibromyalgia Support Group

Dear Joan,

As you know, there was excellent attendance at our patient information afternoon with our lecture room full to capacity. There has been excellent feedback from our patients who suffer from fibromyalgia. They appreciated the fact that you discussed many aspects of the condition which they feel often go unrecognised. One patient commented that she was so glad to hear that patients with fibromyalgia suffered from poor memory at times – 'fibro fog' – as she had been worried about this particular symptom.

Our patients valued being given practical tips on management and were impressed with the ongoing research with which the group is so active. We really appreciated your contribution from which many have benefitted in this area.

Kind regards

Dr Shauna Fannin
